# HOW TO USE THIS RESOURCE LIST

Finding free stock images for commercial use for your books can be a pain. Just running a quick search for royalty-free images will bring you to tons of websites, some offering genuine free images and some that require payment to download any of their images.

I have done my best to compile this resource of different sites so you can get free stock images. **Bear in mind all sites have their own rules and regulations regarding their images so please read those before deciding to use any image for your books.**

The best images you want are the ones that fall under the Creative Commons Zero license or similar; meaning you can copy, modify, and use any photo you find, even for commercial purposes, without having to ask permission or provide attribution.

***Please note:*** I suggest you always do your own research when using an image to ensure that its license allows for what you plan to do with the photo. It's up to you to make sure you verify all rights and restrictions regarding any of the resources provided in this resource guide. Site owners may have additional restrictions on image use. Please read each site's terms of service before using their images.
